

Global Protocol for Community-Scale Greenhouse Gas Emission Inventories (GPC)

GPC, the world's most widely-endorsed GHG accounting and reporting standard for cities, enables local leaders to build more effective climate strategies and track the performance of actions already underway.

WITHOUT GPC WITH GPC

Different types of measurements

One measurement

Account for only a portion of emissions

Consistently account for all emissions

Unclear if climate targets will be met

Emissions trajectory well understood

Incomplete data limits investment

Good data drives investment

Unable to relate to national climate action

Can measure city's contribution to national climate efforts
