GREENHOUSE GAS PROTOCOL

Actions and Market Instruments Technical Working Group

Meeting # 2.11

GHG Protocol Secretariat team:
Ralf Pfitzner, Alejandra Bosch, Yumzhana Daneeva, Kevin Kurkul

November 4, 2026

WORLD RESOURCES INSTITUTE

World Business Council for Sustainable Development

AMI standard – TWG alignment process, November 2026 to January 2027

From draft v2 to a TWG-aligned draft for the ISB at the end of January

NOVEMBER 2026

Phase 1 · Read, comment, first poll

4 Nov Draft v2 shared; "assisted reading" in the optional TWG meeting

11 Nov TWG meeting: review process and timeline, discuss Statement 2 eligibility and residual EF

Nov TWG Members comment in the draft and first chapter-by-chapter poll

Nov Small expert groups on open topics (e.g. data and quantification)

24 Nov Additional TWG session if needed (tentative; recorded, asynchronous feedback)

DECEMBER 2026

Phase 2 · Resolve the major open issues

Dec 2,9,16 TWG meetings on the major open topics, cornerstones first, details after

Dec Secretariat consolidates poll results and comments and updates the draft

Dec 16 meeting Vote on the cornerstones

Christmas Content freeze: fundamental decisions taken

JANUARY 2027

Phase 3 · Finalise and confirm

~10 Jan Near-final draft shared with the TWG

Jan Second poll on chapters and final editing

Jan Poll results show where options go to public consultation

End Jan Draft and poll results to the ISB

GREENHOUSE GAS PROTOCOL

How we will align with the TWG

Four channels, triaged so that TWG meeting time goes to the requirements that are genuinely contested

1

Chapter polling

Two rounds (November and January). Each chapter gets a rating plus an open box for major issues, instead of polling all ~500 shall / should / may statements.

2

Comments in the draft

Detailed and editorial points are raised as comments; the Secretariat responds in the text, so meetings can stay focused.

3

Focused TWG meetings

Major open topics: cornerstones first, details after. The last December meeting votes on the cornerstones.

4

Expert groups

Small groups with co-authors and experts on open topics; recorded sessions with time for written feedback.

How feedback is used

Broad support
→ requirement confirmed; chapter closed

Significant objections
→ discussed separately in a TWG meeting; single vote if needed

Views remain split
→ options can be presented in the public consultation

GREENHOUSE GAS PROTOCOL

Thank you!
